Progress of running api gateway, IAM service , customer and account service as docker containers.
As below still the problem of API gateway exiting happens. It seems it requires all the services to operate.

```
hread pool", "attr": {"poolName": "OCSPManagerHTTP", "numThreads": 0, "minThreads": 1, "maxThreads": 10}}
mongo-1 | {"t":{"date":"2026-08-31T09:02:55.539+00:00"},"s":"I", "c":"STORAGE", "id":22270, "ctx":"initandlisten","msg":"Storage engine to use detected by data files", "attr":{"dbpath":"/data/db","storageEngine":"WiredTiger"}}
mongo-1 | {"t":{"date":"2026-08-31T09:02:55.540+00:00"},"s":"I", "c":"STORAGE", "id":22297, "ctx":"initandlisten","msg":"Using the XFS filesystem is strongly recommended with the WiredTiger storage engine. See http://dochub.mongodb.org/core/prodnotes-filesystem","tags":["startupWarnings"]}
mongo-1 | {"t":{"date":"2026-08-31T09:02:55.540+00:00"},"s":"I", "c":"STORAGE", "id":22315, "ctx":"initandlisten","msg":"Opening WiredTiger", "attr":{"config":{"create,cache_size=3289M,session_max=33000,eviction=(threads_min=4,threads_max=4),config_base=false,statistics=(fast),log=(enable=true,remove=true,path=journal,compressor=snappy),builtin_extension_config=(zstd=(compression_level=6)),file_manager=(close_idle_time=600,close_scan_interval=10,close_handle_minimum=2000),statistics_log=(wait=0),json_output=(error,message),verbose=[Recovery_progress:1,checkpoint_progress:1,compact_progress:1,backup:0,checkpoint:0,compact:0,evict:0,history_store:0,recovery:0,rts:0,salvage:0,tiered:0,timestamp:0,transaction:0,verify:0,log:0]}}}
mongo-1 | {"t":{"date":"2026-08-31T09:02:55.813+00:00"},"s":"I", "c":"WTRECOV", "id":22430, "ctx":"initandlisten","msg":"WiredTiger RESS", "category_id":30,"verbose_level":"DEBUG_1", "verbose_level_id":1,"msg":"Recovering log 17 through 18"}}
mongo-1 | {"t":{"date":"2026-08-31T09:02:55.948+00:00"},"s":"I", "c":"WTRECOV", "id":22430, "ctx":"initandlisten","msg":"WiredTiger RESS", "category_id":30,"verbose_level":"DEBUG_1", "verbose_level_id":1,"msg":"Recovering log 18 through 18"}}
api-gateway-1 | [HPM] Proxy created: / -> http://localhost:3001
api-gateway-1 | [HPM] Proxy created: / -> http://localhost:3001
api-gateway-1 | /app/src/middleware/proxyFactory.js:5
api-gateway-1 |     throw new Error('Missing downstream service URL.');
```

I have been troubleshooting this by 1st trying to remove the requirement of all services as they are not been implemented yet.

```
JS proxyFactory.js JS platform.routes.js JS services.js Dockerfile judge-phi4-mini-3.8t
D: > slt-projects > omniChannel > Omini-ChannelV2 - Copy > OmniChannel-API-Gateway > src > config > JS services.js
1 require('dotenv').config();
2
3 module.exports = {
4   iam: process.env.IAM_SERVICE_URL,
5   customer: process.env.CUSTOMER_SERVICE_URL,
6   /* engagement: process.env.ENGAGEMENT_SERVICE_URL,
7   platform: process.env.PLATFORM_SERVICE_URL,
8   product: process.env.PRODUCT_SERVICE_URL,
9   billing: process.env.BILLING_SERVICE_URL,
10  sales: process.env.SALES_SERVICE_URL,
11  usage: process.env.USAGE_SERVICE_URL,
12  ordering: process.env.ORDERING_SERVICE_URL,
13  reporting: process.env.REPORTING_SERVICE_URL,*/
14 };
15
```

Then made the new containers but still nosuccess. Api gateway still exists even when the containers are built with no existing cache.

solving this remains. will try to set a downstream url tomorrow
